

PROBABILITY AND STATISTICS

NAME: _____

DATE: / /

UNIT 1:

Probability : Sample Space and Events - Probability - the axioms of probability. some elementary theorems, conditional probability, Baye's theorem, Random Variables, discrete and continuous probability distributions, distributions binomial, Poisson and normal distributions. related properties sample distributions, sampling distributions, sampling distribution of means, $\bar{x}$

UNIT 2:

Estimation: Point estimation, interval estimation, Introduction to students t-distribution, confidence interval for single mean and single proportions (large and small samples)

UNIT 3:

Testing of Hypothesis I - Testing of hypothesis Introduction, Null hypothesis alternative hypothesis, Type - I & Type - II errors, critical regions, test of hypothesis for single mean (large and small samples) & test of hypothesis for single proportion (large & small samples)

Testing of Hypothesis II - Tests of hypothesis for difference of means (large and small samples), Test of hypothesis for difference of proportions (large samples), Introduction to Chi-Square distributions and goodness of fit.

Unit 4 :

co-relation and Regression Regression.

coefficient of relation, regression coefficient
The life of regression, the rank co-relation
