

212 - E22 - VS BCA - M - 11

FIFTH SEMESTER B.C.A. DEGREE EXAMINATION, MAY 2011

INTERNET PROGRAMMING

Time : 3 Hours]

[Max. Marks : 80

*Answer any five full questions.
Each question carries 16 marks.*

1. a) What is JVM? Explain in brief.
b) Write a Java program which checks whether the list of numbers are prime or not, using command line arguments.
c) Give the difference b/w Java & C++. (4 + 8 + 4 = 16)
2. a) What do you mean by constructor? Explain constructor overloading with example.
b) Explain regarding Final variables & methods with example. (8 + 8 = 16)
3. a) Write a Java program which searches an element in an array using input from keyboard.
b) Explain the string methods with example. (8 + 8 = 16)
4. a) How can we achieve multiple inheritance in Java? Explain in brief.
b) Explain all the different states of Thread Life cycle. (8 + 8 = 16)
5. a) Write an Applet program which reads students rno, name, 2 sub marks & displays total, avg & result.
b) Explain in brief creating & accessing package. (10 + 6 = 16)
6. a) Is a member of class can be common for all the object? Justify your answer.
b) Explain in brief the overriding methods. (8 + 8 = 16)
7. a) Demonstrate reading & writing from file in Java.
b) Explain in brief the methods of graphics class. (8 + 8 = 16)
8. Write a short notes on following (any 4):
 - a) Exception handling
 - b) awt package
 - c) Wrapper classes
 - d) Labelled loop
 - e) Bitwise operators
 - f) String Buffer class(4 + 4 + 4 + 4 = 16)

3051 – E22 – VS BCA – N – 17

FIFTH SEMESTER B.C.A. DEGREE EXAMINATION, NOVEMBER 2017

501 : INTERNET PROGRAMMING

Time : 3 Hours]

[Max. Marks : 80

Answer any five full questions.

1. a) Explain the concepts of OOP's.
b) How Java is different from C and CPP? [8+8=16]
2. a) Describe the structure of typical Java program.
b) Explain features of Java. [8+8=16]
3. a) With example explain command line arguments in Java.
b) With example explain looping statements in Java.
c) How Java is Architecture neutral ? Explain it. [5+8+3=16]
4. a) What are the differences between a class and interface? Give the syntax of class and interface.
b) How multiple inheritance is demonstrated in Java. Explain with example.
c) Write a note on visibility control in Java. [6+6+4=16]
5. a) What is package? Explain some Java package.
b) Write a program to implement all string operations.
c) How vector class differs from an arrays? [6+6+4=16]
6. a) With a neat diagram explain the life cycle of thread.
b) Explain thread priorities with an example. [8+8=16]

[P.T.O.]

5074 – E22 – VS BCA – N – 18

FIFTH SEMESTER B.C.A. DEGREE EXAMINATION, NOVEMBER 2018

INTERNET PROGRAMMING

Time : 3 Hours]

[Max. Marks : 80

Answer any five full questions.

1. a) Explain briefly the Java features.
b) Explain the data types available in Java.
c) Write the scope of variable with an example. (8 + 5 + 3 = 16)
2. a) Explain OOP's concepts.
b) Explain program structure of Java. (8 + 8 = 16)
3. a) What is token? Explain its types.
b) Write a note on command line arguments.
c) Explain looping statements of Java. (6 + 4 + 6 = 16)
4. a) How to create an array in Java? Explain with example.
b) Demonstrate "how multiple inheritance works" with an example.
c) Define the term overriding of methods in Java with an example. (5 + 5 + 6 = 16)
5. a) What is multithread and explain its life cycle.
b) List and explain Java API Packages. (8 + 8 = 16)
6. a) Write a Java program to demonstrate string operations.
b) What is applet? Explain life cycle of applet.
c) Explain exception handling in Java. (4 + 8 + 4 = 16)
7. a) Explain input/output stream classes.
b) List various methods of the graphics class. Which are used to draw various geometric structures?
c) Explain the usage of PARAM tag. (8 + 4 + 4 = 16)
8. Write short notes on **any four**.
a) Vector.
b) Java history
c) Visibility control
d) Thread priority
e) Difference between C and Java
f) Finally. (4 × 4 = 16)

2053 – E22 – VS BCA – N – 19

FIFTH SEMESTER B.C.A. DEGREE EXAMINATION, NOVEMBER 2019

INTERNET PROGRAMMING

Time : 3 Hours]

[Max. Marks : 80

Answer any five full questions.

1. a) Define web page. Explain the characteristics of Java.
b) How is Java program compiled and Interpreted? Explain with example.
c) What is token? 8 + 6 + 2
 2. a) What is constant? How to make variable value as a constant? Explain with example.
b) How to make use of bitwise operators in a Java program? Explain with example. 8 + 8
 3. a) Define class. Explain visibility modes with example.
b) Explain any 4 mathematical methods available in Java with syntax and example.
c) Define overriding. 6 + 8 + 2
 4. a) What is vector class? What are the advantages and disadvantages of vector class methods.
b) Explain different types of Inheritance. 8 + 8
 5. a) Discuss different types of system packages and user-defined packages.
b) Explain different thread methods with syntax. 8 + 8
 6. a) Compare thread class with runnable interface.
b) Explain different types of exception and their usage. 6 + 10
 7. a) Write a Java program to implement thread, applets and graphics by creating bouncing ball.
b) Discuss byte stream class and character stream class. 8 + 8
 8. Write short notes on any four:
 - a) HTML Tag
 - b) Wrapper class.
 - c) Arrays.
 - d) Control structure.
 - e) JVM. 4 + 4 + 4 + 4
-

7051 - E22 - VS BCA - F - 21

FIFTH SEMESTER B.C.A. DEGREE EXAMINATION, FEBRUARY 2021

INTERNET PROGRAMMING.

Time : 3 Hours]

[Max. Marks : 80

Answer any five full questions.

1. a) Explain the OOPs concepts in brief.
b) What is an Array? Write the steps to create an array. (8+6+2)
c) What is Narrowing Conversion? —
2. a) What are the types of Inheritance? Explain them briefly. (8+8)
b) Write a Java program to demonstrate String methods.
3. a) How to handle Exceptions and program to demonstrate finally keyword? (8+8)
b) What is package? Write program to demonstrate User package.
4. a) What is a thread? Explain its life cycle.
b) What are Mathematical functions/methods available in Java? Explain them briefly. (8+8)
5. a) Explain briefly the Input Stream Class and Output Stream Class. (8+8)
b) Define Applet and explain its life cycle.
6. a) Briefly explain the Looping Statements.
b) Program to demonstrate keyboard events.
c) What is overloading? (6+8+2)
7. a) How Vector is different from Array? Explain it.
b) Explain the thread priorities.
c) How to pass parameters from *html* in applet? Explain with example. (4+4+8)
8. Write short notes on any four:
a) this
b) throws
c) Java History
d) Constructor
e) Java API package
f) Wrapper Classes. (4+4+4+4)
