

E4BCA1T2 – E – 26 – 7262

FOURTH SEMESTER B.C.A. (REVISED NEP) DEGREE
EXAMINATION, JUNE 2026
DATABASE MANAGEMENT SYSTEM (DSC – 2)

[Max. Marks : 80]

Time : 3 Hours]

Instruction : Answer the following questions.

PART – A

(10×2=20)

Answer **all** the following questions. **Each** question carries 2 marks.

1. Write any 2 characteristics of database approach.
2. Who are the people working behind DBMS ?
3. Define schema and instance.
4. What is Relational Model ?
5. Define domain constraints.
6. What is functional dependency ? Explain.
7. Expand DML, DCL.
8. What are primary key and foreign keys ?
9. Explain union operator with syntax and example.
10. List SQL logical operators.

PART – B

(6×5=30)

Answer **any 6** questions. **Each** question carries 5 marks.

11. Explain any 2 data models.
12. What is E-R Model ? Explain 4 E-R diagram notations (symbols).

[P.T.O.]

13. What are key constraints ? Explain in detail.
14. Write a note on Join operator.
15. Explain the informal design guidelines for Relational Schema.
16. Explain any 5 DDL commands with syntax and example.
17. When do we use – “between, like, in, exists and isnull” operators in SQL ?
18. Explain aggregate functions in SQL.

PART – C

Answer **any 3** of the following. **Each** question carries **10** marks. **(10×3=30)**

19. a) List advantages and disadvantages of DBMS.
b) Explain data abstraction in detail.
20. Explain basic and additional relational algebraic operations in detail.
21. What is normalization ? Explain different types of normal forms.
22. Write short note on :
 - a) Character function in SQL
 - b) Views in SQL.
