Program List

- ① a) Write a python program to print "Hello Python"
- b) Write a python program to do arithmetical operations
- ② Write a python program to find the area of triangle
- ③ Write a python program to solve quadratic equation
- ④ Write a python program to swap two variables
- ⑤ Write a python program to convert Celsius to Fahrenheit
- ⑥ Write a python program to check if number is Odd or Even
- ⑦ Write a python program to print all Prime numbers in an interval
- ⑧ Write a python program to find the factorial of a number
- ⑨ Write a python program to display the Multiplication table.
- ⑩ Write a python program to multiply two matrices
- ⑪ Write a python program to Find LCM & GCD using function
- ⑫ Write a python program to read a word and print the number of letters, vowels in the word.
- ⑬ Write a python program to input an array of n numbers and find separately the sum of positive and negative numbers
- ⑭ Write a python program to search an element using linear equation
- ⑮ Write a python program to search an element using binary search
- ⑯ Write a python program to insert a number in sorted array
- ⑰ Write a python program to draw shapes & GUI controls
- ⑱ Write a python program to simulate stack operations
- ⑲ Write a python program to using built in methods of the string, list and dictionary classes
- ⑳ Write a python program to demonstrate exception handling
